

Ryley Learning delivers the highest quality workplace learning and compliance products. Our mandate is to make workplaces safer, and ensure that our customers minimize their legislative and financial risks, and avoid reputational harm.

Avoid legal risks and liability.

Sexual harassment is prohibited by law: human/ civil rights, occupational health & safety, and even criminal laws. Allegations and incidents can attract high legal fees, fines, settlements, and damage awards. Effective training can limit corporate liability if there are lawsuits or discrimination charges or claims.

Comply with training laws in the place(s) you do business.

Training on sexual harassment is mandatory by law in a growing number of North American jurisdictions. Ryley Learning's courses meet these legal requirements, and are designed by a lawyer.

Protect Your People.

Impactful training creates a shared understanding of what conduct is prohibited. This reduces the likelihood of workplace sexual harassment occurring in the first place. Prioritize your employees' safety, legal rights, and wellbeing with engaging training.

Protect Your Brand.

Allegations and incidents of sexual harassment can be a "brand killer," as is apparent from the recent flood of lawsuits, scandals and #MeToo revelations.

Engaging, Interactive Learning.

Follow true-to-life characters in a range of animated scenarios as employees and managers witness, experience, and address workplace sexual harassment. Interactive, gamified activities ensure the message sinks in.

Animated Storytelling.

Animation is a powerful educational tool that creates empathy. Big ideas can be explored through individual engagement, and animation is a welcome alternative to conventional power point, text driven or classroom instruction.
